

**November 16<sup>th</sup> 2015, Westford MA.**

**Enclustra names Long Sought for Design as Eastern US representative.**

Westford, MA, November 16th, 2015 — Enclustra GmbH a Swiss manufacturer of FPGA modules, vertically integrated IP and hardware design services has named LSF Design, LLC. of Westford, MA as their sales and support representative for the Eastern United States.

“We are excited to partner with Enclustra” said Kevin McCluskey President of LSF Design. “The Enclustra FPGA modules are the perfect choice for anyone looking at embedded systems, SOC or IOT solutions.” McCluskey continued “This allows LSF to offer customers a wide variety of FPGA choices on standardized base boards or as a plug-in module to their own board. It cuts your FPGA development time dramatically.” LSF will be providing sales, technical and design support to customers throughout the eastern part of the US.

Enclustra, based in Zurich Switzerland offers a mix of Altera and Xilinx based FPGA and SOC modules with the aim of simplifying the overall design of your FPGA-based system. The company offers base boards, hardware kits, IP and “FPGA Manager™” an IP & Software toolset that allows for easy and efficient data transfer between a host and an FPGA over different interface standards like USB 2.0/3.0, Gigabit Ethernet and PCI Express. FPGA Manager includes host libraries and a simple API for data access.

LSF Design, based in Westford MA is a hardware design Services Company specializing in FPGA based embedded and scientific computing applications. LSF Provides FPGA design, Board design, prototyping and system integration services.
